**SUPPLEMENTAL ACTION**

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Volkmann (Reg. No. 60,349) on Thursday, June 12, 2008.

In claim 26 line 4 "a first power supply contact of" -- has been added after the term "to".

In claim 26 line 5 "associated with" has been changed to -- connection of --.

In claim 26 line 6 -- and a third contact for connecting to a second power supply contact of the power source -- has been added after the term "source;".

In claim 30 line 1 "The controller of claim 30" has been changed to -- The controller of claim 29 --.

***Response to Arguments***

Applicant's arguments, filed 3/26/2008, have been fully considered and are persuasive. The previous rejection has been withdrawn.

***Allowable Subject Matter***

Claims 1-12 and 26-38 are allowed. The following is an examiner's statement of reasons for allowance:

With respect to claims 1-12 Willis teaches an inrush current controller for a device, Willis does not teach the impedance control circuit includes a first timer which is triggered by the device being plugged into the source of energization and the logic output from the source enabling a limited inrush at the current input during a second time interval controlled by a second timer. At least this further limitation is not taught or rendered obvious by the prior art of record.

With respect to claim 26-32 Willis teaches a controller for a device and a controller, however does not teach impedance control circuit comprises a first timer coupled to the current input as claimed wherein the first timer is enables when a connection is made between the connector and the power source in combination with the impedance control circuit enabling a limited amount of current at the current input based on the logic output during a second time interval. At least this further limitation is not taught or rendered obvious by the prior art of record.

With respect to claim 33-38 Willis teaches a controller for a device and a controller, however does not teach impedance control circuit comprises a first timer configured to force the impedance off during a first time interval controlled by the first timer in combination with a second timer configured to provide a current limiting output during a second timer interval. At least this further limitation is not taught or rendered obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Rutland-Wallis whose telephone number is 571-272-5921. The examiner can normally be reached on Monday-Thursday 7:30AM-6:00PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Sherry can be reached on 571-272-2084. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
